The Company, as previously advised, has been granted approval by the Southern California Public Power Authority (SCPPA) to enter into power purchase negotiations with its members. Negotiations are ongoing with large power providers in the Southern California region to subscribe to the power output (200MW) of the proposed the Solar Tower development. Discussions are at an advanced, it is expected that the potential power output from the Solar Tower will be fullt subscribed which will provide a key element for commercial development of the Solar Tower. The signing of a power purchase agreement will assist in assigning value to the technology held by Enviromission Limited, being the worldwide rights to develop Solar Towers, by measuring its potential cash inflows.

The board have elected to make a provision for impairment of the Australian licence held by Enviromission Ltd's 100% owned subsidiary SolarMission Limited. The Company does not intend to enter into negotiations to develop the Solar Tower technology in Australia on a commercial basis until the terms and conditions available in Australia compete economically with those available to the company in other jurisdictions. Due to these circumstances it is difficult to determine the carrying value of the licence and it was determined that it should be treated as fully impaired with a carrying value of \$nil. The directors believe that the future value of the licence will be determined and influenced by the success of the Solar Tower development in Arizona.
