## Shareholder Update.

Dear EnviroMission Shareholder,

EnviroMission will hold an Extraordinary General Meeting (EGM) as soon as practical following the completed audit of accounts to present the financial, strategic and operational activities of the company to shareholders.

Despite the enormous global imposts of COVID restrictions and the associated unprecedented uncertainty, EnviroMission has continued to cultivate opportunities for development and facilitated additional engineering innovation from collaborators based in the United Kingdom, United States & Middle East. All engineering innovation has been tasked with reducing construction costs in parallel with increasing energy production for increased commerciality for projects earmarked for development.

The rapid pivot of global governments toward increased mandates for renewable and low emission energy generation places EnviroMission in a renewed position of interest to present the economic & engineering case for Solar Tower power station technology without needing to argue the case for disruptive renewable energy options.

The virtual office has benefited from the nuances of time and distance associated with working with internationals that has resulted in an even more collaborative environment sensitive to the restrictions of the global pandemic.

Despite all challenges, the value of the technology and the prospects available to the company has enabled capital to be raised to continue operations.

Details of inbound investment, commercial negotiations and engineering progress will be presented in the notes to accompany the notice of meeting (EGM) and at the EGM.

Ends

Kim Forte  
Director Communications  
EnviroMission Limited

Roger Davey  
Executive Chairman  
Chief Executive Officer  
EnviroMission Limited.
